REPORT OF THE
BOARD OF EDUCATION,
FOR THE YEAR ENDING MARCH 1, 1890.

To the people of Langdon :—

As will be observed by the following report but three schools have been maintained in town during the past year, those scholars residing in Nos. 4 and 5 generally attending No. 3. Although this has occasioned considerable outlay for transportation, we think any one who will give the matter candid consideration must admit that those scholars have secured more schooling than would have been possible in any other way with the same outlay of money, and this without crowding No. 3 in the least.

Your committee feel that they have been quite fortunate in the selection of teachers of during the past year, the schools having been well governed and very satisfactory progress made in cases where scholars have attended regularly. We cannot too strongly urge upon parents the necessity of regular attendance of their children at school. Those scholars who attend school two or three days and remain at home three or four days following, or go to school one week and are out the next, not only entirely waste their own time, but are a constant source of annoyance to their teacher and classmates.

Number of schools maintained, 3; number of terms of school, 8; number of weeks of school, 77; number of children between the ages of five and fifteen years as reported by the

selectmen, 41 (boys 22, girls 19); number of children between the ages of five and fifteen years not attending any school, 1.
